

Canterbury Farms recommends...

DEER-RESISTANT PLANTS

We know how frustrating it can be to install new landscaping only to have the local wildlife treat your beautiful plants as their own personal salad bar. While there are no plants that are 100% guaranteed to be repugnant to deer, (they will eat just about ANYTHING that grows if they're really hungry!) here are some of our recommendations to help keep those naughty nibblers at bay.

Flowering Shrubs &

Perennials

- Abelia
- African Iris
- Agapanthus
- Agave
